Loves♥ Letter: May 2005

Dear Friends of Fine Art,

What do you see when you visit a top notch museum or gallery and more importantly, how does it make you feel? Do you revel in the color or does its effect from light move you? Do you see the nuance within each brush stroke or are you swept away with the essence of the story? Kindly look at Pino's work here and on our web site (www.lovesemporium.com) to feel his genius. Interpret the story for yourself and enjoy completing it forever.

We've noticed daily at Loves' that our clients want to complete the story. That's power! People who love Pino for his story telling artistry will want to join us and become part of his story. Pino will go down in history as a master. . . clients and critics agree that Pino is helping to redefine the modern figurative with his "Contemporary Realism" in such a way as to change the way we enjoy living with and for things of lasting beauty. So don't miss out. . . these events here in lil' ole St. Augustine are drawing national attention. Thanks to you we've made it and we pledge to keep striving to bring you the very best in fine art without the hassle of going to a big city to find it. In fact, if you are there you need to come here.

With Love,
